

AI Wellness Twin

Intelligent Digital Twin for Proactive Workplace Burnout Prevention

Live Application: https://ai-wellness-twin.vercel.app	Key Innovation: 2–4 Week Predictive Horizon	Privacy Architecture: Strict $k \geq 3$ Anonymity
---	---	---

THE PROBLEM

The \$322 Billion Silent Workplace Burnout Crisis

76% Knowledge Worker Burnout Acute cognitive exhaustion driven by endless context-switching and blurred boundaries.	21.5 hrs Weekly Meeting Overload Schedule fragmentation leaves zero deep-work blocks, triggering late-night overtime.	Too Late Quarterly Surveys Fail HR pulse surveys are retrospective. By the time scores dip, staff have already quit.
---	---	--

■ **The Existing Dilemma:** Companies are forced to choose between invasive surveillance tools (which destroy trust) or useless retrospective surveys. There is no continuous, privacy-first alternative.

THE SOLUTION

A Continuous, Calibrated Digital Twin

1. Multi-Modal Passive Telemetry Passively aggregates signals across 9 workplace tools (IDE, GitHub, Calendar, Slack, ChatGPT, etc.) via metadata firewall.	2. 28-Day Personal Calibration Evaluated strictly against an individual's historical rhythm. Zero peer leaderboards or toxic rankings.
3. 'What-If' Twin Simulator Interactive parameter simulation forecasting burnout recovery when meeting loads are reduced or focus blocks restored.	4. Strict k-Anonymity ($k \geq 3$) HR identifies systemic department hazards while mathematically guaranteeing zero individual snooping.

DATA INGESTION ENGINE

9 Supported Workday Integrations (Zero Content Logging)

■ GitHub: Commit & PR timestamps	■ VS Code: Focus session blocks	■ ChatGPT: AI reasoning pacing
■ Gemini: Research session windows	■ Claude: Deep-work intervals	■ Calendar: Meeting density & gaps
■ Figma: Design canvas active time	■ Slack: After-hours messaging	■ Discord: Voice & community chat

■ **Metadata Firewall Guarantee:** Zero keystrokes, prompt contents, source code, or meeting titles are ever stored or transmitted.

USER EXPERIENCE

Dual-Portal Architecture: Employee vs. HR Leadership

■ Employee Portal (/dashboard) • Digital Twin Vitality Score (0–100) • 4-Axis Burnout Risk Radar • 'What-If' Parameter Simulator • MBI-GS Burnout Surveys • Personalized Micro-Habit Interventions	■ HR Leadership Cockpit (/hr) • Organization-Wide Vitality Radar • Department k ≥ 3 Privacy Lock Shield • Single-Use Cryptographic Invite Generator • Longitudinal Overtime Early Warning • Strict Zero Access to Employee Dashboards
---	--

MARKET OPPORTUNITY

A Massive \$61B+ Global Opportunity

\$61.2B TAM (Total Market) Global corporate wellness & employee vitality market by 2027 (CAGR 7.4%).	\$23.8B SAM (Serviceable) B2B tech and remote workforce mental health & retention software.	\$3.2B SOM (Initial Beachhead) High-growth software engineering & design enterprises adopting active telemetry.
---	--	--

BUSINESS MODEL

B2B SaaS Tiered Subscriptions

Starter \$6 / seat / mo For startups (10-50 seats). 4 core connectors, personal twin score, basic assessment.	Growth / Pro (Popular) \$12 / seat / mo For mid-market (50-500 seats). All 9 apps, 'What-If' simulator, HR k ≥ 3 radar.	Enterprise \$18 / seat / mo For 500+ seats. Custom telemetry webhooks, SSO / Okta, dedicated AI coach.
--	--	---

ROADMAP & NEXT STEPS

Join Us in Building the Future of Sustainable Work

Phase 1: Production MVP COMPLETED · Q3 2026 Next.js 16 live deployment, 9 app integrations, Twin Simulator, role-isolated portals.	Phase 2: Wearable Biometrics IN PROGRESS · Q4 2026 Apple Watch, Oura, Whoop sync for sleep/HRV. Autonomous calendar buffer auto-blocking.	Phase 3: Autonomous Twin FUTURE · 2027+ Enterprise workload auto-rebalancing, clinical burnout risk certification.
---	---	---

■ **The Ask: Seeking Pilot Enterprise Partners and Pre-Seed Investment to scale wearable integrations and enterprise sales.**
